TriageID

Saving lives in triage, one tap at a time

Try Pitch

370,000

suffer serious harm

SECONDS MATTER

minutes cost lives

Try Pitch

Status Quo

- Only name + DOB
- Hospital-specific

- Locked behind logins
- Limited cross-hospital access
- Not designed for rapid emergency scanning
- Contains too much information to once to process fast

- Require phone access
- Phone may be locked or dead
- Not reliable in emergencies

There is no universal, instant, quick-scan emergency bridge.

Try Pitch

Instant, secure access to a brief summary of life-critical patient data — anytime, anywhere.

Here's how we built it.
